WATERSTOP
PROFILE

Waterstop profile

The Plastics Experts.

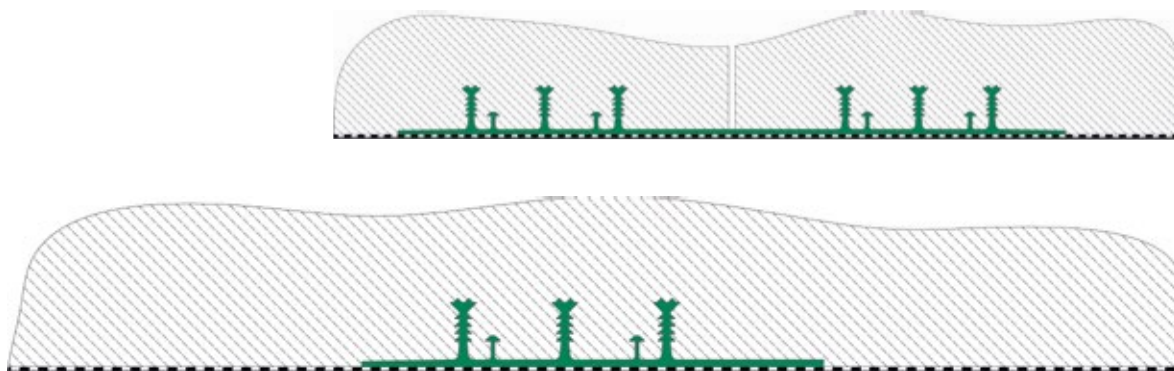

AGRU Kunststofftechnik GmbH is a family-owned, highly productive company headquartered in Austria with worldwide activities. For more than 50 years, AGRU has been at the forefront of thermoplastic technology - producing and selling a wide range of pipes, fittings, semi-finished products, concrete protective liners and geomembranes.

The extensive production capability provides a wide range of geomembrane products made of PE, FPP and TPO. The main applications are in hydraulic and landfill engineering, ground water protection and water proofing of tunnels. Geomembranes from AGRU are field proven since many years in numerous applications around the globe.

In addition to geomembranes, also external water stop profiles are offered. They are made of selected and approved VLD-PE materials. The arrangement of the studs ensures a tight connection with the concrete. The main application is waterproofing of expansion and construction joints.

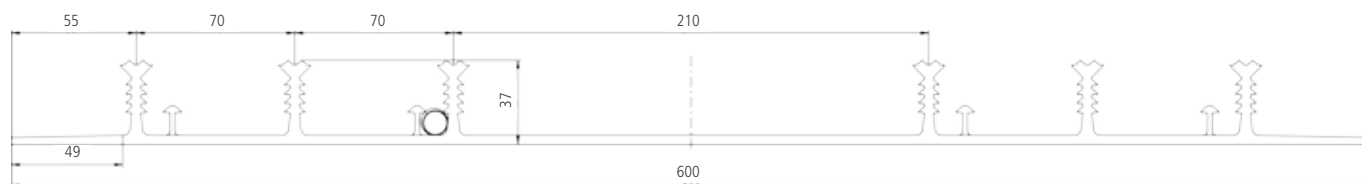

Advantages of AGRU waterstop profiles

- Meet requirements of DIN V 18197:2005 and DIN E 1854103/2005
- Approved according to German ZTV-ING and the Austrian ÖBV regulation
- Free of plasticisers and halogens
- Integrated injection hose clamping system
- Excellent flexibility
