Product catalog Tee long spigot

The injection moulded tee OD 630 SDR 11 is now available!  
Create pressure class compliant branches on your pipe with the premium solution!

The extended version can be used for both heating element butt - and electrofusion welding.

It can also be installed without sand bedding thanks to the stress crack resistant PE 100-RC material, offering maximum flexibility and safety.

This unique fitting extends the AGRULINE range and sets a new benchmark.
